

### About the PharMethod PharmaCast iPhone App

With PharmaCast Mobile you can view live programs from a mobile phone. It allows you to toggle between live speaker video and their corresponding presentation slides.

PharmaCast events are live so viewers must sign in at an event's scheduled date and time. Events are invitation only, pre-registration is mandatory and the app requires login credentials (as provided by the event host) for viewing.

### Acquiring the App:

This app is available for free thru iTunes at the following location:

<http://itunes.apple.com/us/app/pharmacast-mobile/id404006674?mt=8>

Or search for: "PharmaCast" on iTunes

### Specifications:

- Compatibility: PharmaCast Mobile is for use with iPhone 4 or higher, iPad, or iPod Touch.
- Screen Resolution: 960 x 640 pixels

### Screens used in the PharmaCast application:

There are several screens available for use during the course of the application's implementation. These screens are specified below.

<b>Splash Screen</b>	This brief, initial screen that is displayed when the application is first launched. Its size is 960 x 640 and display's PharMethod logo. The splash screen only appears as the vertical screen orientation.
<b>Sign On Screen</b>	This Sign On screen is where the user should input his or her meeting URL, username and password to log in to a PharmaCast meeting. This information is generally provided via email after a normal registration process. The sign on screen can appear in both vertical and horizontal screen orientations.
<b>Tab View</b>	The Tab View is the core of the application, and contains the main functionality that the application utilizes to display a virtual event (speaker view, slide view or chat view.) The tab view can appear in both vertical and horizontal screen orientations.

### Tabs

During operation, you have access to three tabs that make up the content for your meeting. The tabs and their functionality are listed below.

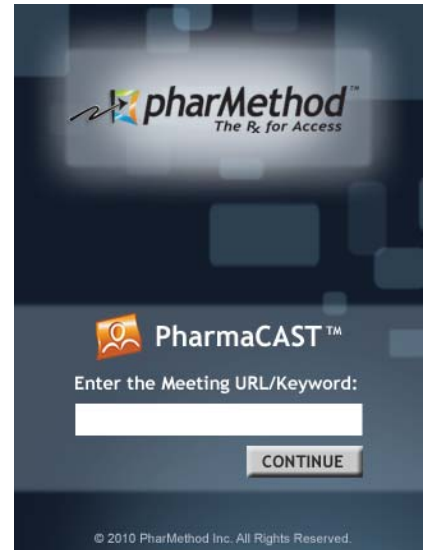

<b>Video</b>	Video resolution is 320 x 240 and may increase based on available bandwidth.
<b>Slides</b>	Slides are based on the original PowerPoint, but will not contain animations.
<b>Chat</b>	Questions to the presenter as well as technical support questions can be submitted through this tab.
